Master Parts Manual

Manual des pièces • Manual de Piezas Prototipo
Ersatzteilhandbuch • Cataloga Parti Principale

Introduction - English

The purpose of this Master Parts Manual is to give a record of the parts used on Lister-Petter TS and TR engines together with alterations and modifications that have been effected.

Main bearings and big end bearings are available undersize and pistons and rings are available oversize. Piston rings are only supplied as a complete set and pistons are supplied complete with rings, gudgeon pin and circlips.

Due to continued development and improvement it is quite possible that a part purchased may not completely resemble that illustrated. Not all items are illustrated and if an item is listed without a part number it is only available as part of an assembly. Although a part number may be shown, the item may not be available on its own but as an assembly. Items that are shown indented under an entry are included in, and form part of an assembly.

To help the user identify parts, most lists have an illustration with the individual parts given the same item number reference as appears in the list. Care should be taken to ensure the correct illustration is being referred to.

Replacement parts should be ordered by quoting the Part Number, not the illustration item number, and the engine serial number.

Each engine has a unique serial number which is stamped on a plate attached to the air cowling. It is necessary for this serial number to be identified before using this manual to ensure the part being requested is correct for the particular engine. Where the Build Number is preceded by a 9 this indicates that the engine is either of a non-standard configuration, or contains non-standard parts or accessories.

CAUTION

Parts that have not been approved for use on TS or TR engines cannot be relied upon for correct material, dimensions or finish.

Introduction - Français

Ce Manuel des pièces constitue un dossier présentant les pièces utilisées sur les moteurs TS et TR Lister-Petter ainsi que les changements et modifications qui ont été effectués.

Les paliers et les coussinets de bielle sont disponibles minorés et les pistons et les segments sont disponibles majorés. Les segments de piston ne sont fournis que sous forme de jeu complet et les pistons sont fournis dotés de segments, d'axe et de circlips.

En raison d'une politique de développement et d'amélioration permanents, il est tout à fait possible qu'une pièce achetée puisse ne pas entièrement ressembler à celle illustrée. Ce ne sont pas tous les articles qui sont illustrés et, si un article est listé sans numéro, il n'est disponible que comme partie d'un ensemble. Bien qu'un numéro puisse être indiqué, l'article peut ne pas être disponible tout seul, mais sous forme d'ensemble. Les articles qui sont mis en retrait sous une entrée sont inclus dans un ensemble et font partie de ce dernier.

Afin d'aider l'utilisateur à identifier les pièces, la plupart des listes comportent une illustration, les pièces individuelles étant affectées de la même référence que celle figurant sur la liste. Il faut veiller à se référer à la bonne illustration.

Les pièces de rechange devraient être commandées en indiquant le numéro de la pièce, et non le numéro de l'illustration, et le numéro d'ordre du moteur.

Chaque moteur comporte un numéro d'ordre unique qui est gravé sur une plaque attachée au capot. Il est nécessaire de vérifier ce numéro d'ordre avant d'utiliser ce manuel pour veiller à ce que la pièce demandée soit correcte pour le moteur particulier. Lorsque le numéro de construction est précédé d'un 9, cela indique que le moteur est d'une configuration non standard, ou contient des pièces ou accessoires non standards.

ATTENTION

On ne peut pas se fier aux matériaux, dimensions ou fini des pièces qui ne sont pas homologuées pour utilisation sur les moteurs TS ou TR.

Einleitung - Deutsch

In diesem Teilehauptbuch sollen die bei Lister-Petter Motoren TS und TR zur Anwendung kommenden Teile sowie die daran vorgenommenen Änderungen und Modifikationen aufgeführt werden.

Hauptlager und Pleuelfußlager können mit Untermaß geliefert werden, Kolben und Kolbenringe mit Übermaß. Kolbenringe werden nur satzweise geliefert, Kolben komplett mit Ringen, Kolbenbolzen und Sicherungsringen.

Angesichts fortgesetzter Weiterentwicklungen und Verbesserungen kann es vorkommen, daß ein gekauftes Teil nicht immer ganz dem abgebildeten gleicht.

Nicht alle Teile sind abgebildet, und wenn ein Teil ohne Teilnummer aufgeführt wird, wird es nur als Teil einer Baugruppe geliefert. Auch wenn eine Teilnummer angegeben ist, kann das betreffende Teil ggf. nicht allein, sondern nur als Baugruppe gekauft werden. Eingerückte Teile unter einer Eintragung gehören zu und bilden einen Teil einer Baugruppe.

Um dem Benutzer die Identifizierung von Teilen zu erleichtern, kommen die meisten Listen mit Abbildung, und die Einzelteile haben die gleiche Kennnummer wie in der Liste. Es ist daher darauf zu achten, daß immer auf das richtige Bild verwiesen wird.

Bei der Bestellung von Ersatzteilen ist nicht die Kennnummer der Abbildung, sondern die Teilnummer und die Seriennummer des Motors anzugeben.

Jeder Motor hat seine eigene Seriennummer, die auf einem Schild an der Luftkanalverkleidung eingestanzt ist. Diese Seriennummer ist vor Benutzung dieses Buches zu ermitteln, um sicherzustellen, daß das richtige Teil für den betreffenden Motor bestellt wird. Wenn der Bauartnummer eine 9 vorausgeht, ist der Motor entweder eine Sonderkonfiguration, oder er enthält nicht serienmäßige Teile und Zubehör.

VORSICHT

Wenn Sie Teile bestellen, die nicht für Motoren TS oder TR zugelassen sind, können Sie sich nicht auf die richtigen Werkstoffe, Abmessungen und Ausführung verlassen.

Introducción - Español

El objeto de este Manual de Piezas Prototipo es dar una descripción de las piezas usadas en los motores de Lister-Petter TS y TR, junto a las modificaciones y alteraciones que se hayan efectuado.

Los cojinetes principales y los cojinetes de biela están disponibles en tamaños reducidos y los pistones y los aros de pistón en tamaños ampliados. Los aros de se suministran exclusivamente como juegos completos y los pistones se proporcionan completos con muñequillas y fiadores de perno.

Debido al continuo desarrollo y perfeccionamiento es muy posible que se adquiera alguna pieza que no asemejara totalmente a la ilustrada.

No todos los artículos tienen ilustración y si alguno figurara en lista y no tuviera número de pieza, es por que sólo está disponible como parte de una unidad completa. Aunque figurara el número de pieza, pudiera ser también que no estuviera disponible solo, sino como parte de una unidad completa. Los artículos que figuran sangrados debajo de una entrada están incluidos y forman parte de una unidad completa.

Con objeto de ayudar al usuario a identificar las piezas, la mayoría de las listas tienen una ilustración en la que las piezas individuales tienen el mismo número de referencia de artículo que el que aparece en la lista.

Para ordenar piezas de repuesto deberá citarse el Número de Pieza, no el número del artículo en la ilustración, y el Número de Serie del Motor.

Cada motor tiene un número de serie único, que lleva grabado en una placa fijada a la cubierta del aire. Resulta necesario comprobar el número de serie antes de hacer uso de este manual para asegurarse de que la pieza requerida es la adecuada para el motor del que se trate en particular. En los casos en los que el Número de Construcción vaya precedido de un 9, esto indica bien que el motor no es de configuración prototipo o bien que contiene piezas o accesorios que no lo son.

PRECAUCIÓN

No se puede tener confianza en que las piezas que no hayan sido aprobadas para usarse en TS o TR sean del material correcto o tengan las dimensiones o acabado apropiados.

Introduzione - Italiano

Lo scopo di questo Manuale dei Pezzi Principali è quello di dare una documentazione dei pezzi usati sui motori Lister-Petter TS e TR, assieme alle variazioni e modifiche che sono state effettuate.

I cuscinetti principali e i cuscinetti di biella sono disponibili minorati, mentre i pistoni e gli anelli sono disponibili maggiorati. Gli anelli dei pistoni sono forniti solo come gruppo completo e i pistoni sono completi di anelli, spinotto e anelli elastici di arresto.

A causa della linea di continuo sviluppo e perfezionamento, è possibile che un pezzo acquistato non sia esattamente come quello illustrato.

Non tutti gli articoli sono illustrati e se un articolo è elencato senza un numero categorico, è disponibile solo come parte di un complessivo. Anche quando un numero categorico è indicato, l'articolo non è necessariamente disponibile da solo, ma come complessivo. Gli articoli che sono indicati rientrati sotto un titolo sono inclusi in un complessivo e ne fanno parte.

Per aiutare l'utente ad identificare i pezzi, la maggior parte degli elenchi ha un'illustrazione con i pezzi individuali ai quali viene dato lo stesso numero di riferimento del pezzo che appare sull'elenco. Si dovrà fare attenzione di consultare l'illustrazione corretta.

I pezzi di sostituzione dovranno essere ordinati citando il numero categorico, non il numero d'articolo dell'illustrazione, e il numero di serie del motore.

Ciascun motore ha un numero di serie individuale che è stampato su una piastra attaccata alla cappottatura dell'aria. E' necessario identificare questo numero di serie prima di usare questo manuale per accertarsi che il pezzo richiesto sia corretto per il particolare motore. Quando il numero di costruzione è preceduto da un 9, ciò indica che il motore o presenta una configurazione non standard, o contiene pezzi o accessori non standard.

ATTENZIONE

I pezzi il cui uso non è stato approvato per i motori TS o TR non sono affidabili quanto a materiale, dimensioni o finitura.

Accessory Kits

Some accessory kits are not compatible with others or suitable for all engine builds. In some instances more than one accessory kit code is included in the listings on a page. In these cases care must be taken to check the details given in 'Description of Accessory Kit' to help

identify the kit items needed, as more items than are actually required in a specific accessory kit may be listed. **Please Note:** All Marine Accessories shown in this listing are not included in this manual. For further information refer to Lister-Petter.

Adaptors

TS Engine Builds

Some Builds may not be available in all engines or cylinder configurations.

Where the build number is preceded by a 9 this indicates that the engine is either of a non-standard configuration, or contains non-standard parts or accessories.

When new parts are required for such a build it is suggested that reference be made to Lister-Petter to determine the exact engine specification and which parts are non-standard.

Build	Detail
01	Variable speed up to 2500 r/min* with no overload
02	Variable speed up to 2500 r/min* with no overload
03	Variable speed up to 3000 r/min with no overload, high speed flywheel
04	Variable speed up to 3000 r/min with no overload
05	Variable speed up to 2500 r/min with overload, provision for hydraulic pump
06	Variable speed up to 2500 r/min* with overload, provision for hydraulic pump
07	Variable speed up to 2500 r/min* with overload, provision for hydraulic pump

TR Engine Builds

Some Builds may not be available in all engines or cylinder configurations.

Where the build number is preceded by a 9 this indicates that the engine is either of a non-standard configuration, or contains non-standard parts or accessories.

When new parts are required for such a build it is suggested that reference be made to Lister-Petter to determine the exact engine specification and which parts are non-standard.

Build	Detail
01	Variable speed up to 2500 r/min* with no overload
02	Variable speed up to 2500 r/min* with no overload
03	Variable speed up to 3000 r/min with no overload, high speed flywheel
04	Variable speed up to 3000 r/min with no overload
05	Variable speed up to 2500 r/min with overload, provision for hydraulic pump
06	Variable speed up to 2500 r/min* with overload, provision for hydraulic pump
07	Variable speed up to 2500 r/min* with overload, provision for hydraulic pump
08	TR1 - Genset Build - 1500 r/min with overload, heavy flywheel TR2,3 - Genset Build - up to 1800 r/min with overload, heavy flywheel
09	Fixed speed up to 1500 r/min with overload
10	Genset Build - 1800 r/min with overload
11	Genset Build - 1800 r/min with overload

Camshaft and Governor - Early Engines

Notes:

There have been alterations to the governor assembly and the two types are not totally interchangeable.

A one-piece 'Nylatron' sleeve has been introduced to replace the original sleeve assembly.

The Nylatron sleeve is interchangeable with the older assembly if the:

- Governor lever shoes are removed,
- Governor weight shoes are removed,
- Governor sleeve setting 'A' is set at 9,5mm (refer to the Workshop Manual).

Re-designed pivot blocks and return springs are now fitted with the springs not being interchangeable, if the pivot blocks are changed the return springs must also be changed.

All of the above changes were introduced on the following engines:

35 01614 TS1	36 00001 TR1
35 07495 TS2	36 00011 TR2
35 06047 TS3	36 00141 TR3

From the above engines refer to 'Camshaft and Governor - Later Engines'
