LUBRICANTS MANUAL

The oil grades contained in this manual are those supplied to Winget Limited by Total Fina Oils.

Your oil supplier will be able to recommend equivalent grades. When selecting engine oils attention should be given to the prevailing ambient temperatures. Guidance can be obtained by consulting the relevant Engine Handbook, your oil supplier or your local Lister, Perkins, Deutz, Yanmar or Honda Distributor. You should note that use of incorrect oils in lightly loaded engines especially Lister Petter LT/LV1 and TS/TR can lead to problems with bore glazing, excess oil consumption and excess carbon build up.
